Product Design And Development

Design development and sampling forms a core part of our operations and a key differentiation in the way we do business.

We have qualified and technical designers over 15 year old experience. We have an active library of many designs for Print, dobby and jacquard, with an average of at least 5 new designs being added to the portfolio every day. This ongoing design development and extensive design database enables us to be a trendsetter in the market.

Timely Execution

Time is money and profits drive businesses, which we believe steadfastly.

G T I L believes in undertaking challenging yet reasonable delivery schedules which we can practically adhere to. Depending on several factors as we all know, schedules will be communicated and order fulfillment completed within the specified time frame as contracted.

Quality

Quality is an uncompromising fact of life at Globe where our primary focus is to first understand client's requirement and specifications, and then design, develop and deliver products adhering to them. We ensure satisfied repeat clientele as a norm which to us ultimately means achieving and exceeding client's expectations.

● **Go Green Bag**
(All type of Fabric Bags)

● **Outdoor /Furniture Fabric.**

Today's outdoor products are more sophisticated in design, embellished with a new array of weather-proof trims for added pop. Thanks to innovations in UV-resistant, mildew-resistant and water-repellent fabrics, consumers are finding they can decorate their outdoor spaces with just as much panache as they exhibit inside.

Krishna Home Textiles is your right platform for specially all kind of print outdoor fabric and product.

● **Tent Fabric**

Krishna Home Textiles is also working with all type of tent fabric print solutions for large outdoor exhibitions, romantic wedding banquets, large warehouse, sports events, tourism, leisure, tent hotels, large concert, and other occasions. We provide "One-Stop Print solution of tent fabric. Accounting to customer requirement we are able to print high fastness of colour and also able to do water repellent and rainproof/waterproof fabric.

Our Digital Print Capacity

Digital sublimation Print technology which has made it easy to enter the world of digital apparel printing. New advances in sublimation printing systems have yielded HD & photographic printing quality, a large range of colours options, faster printing & drying speeds.

Sublimation printing is a process that requires six main Elements: Inkjet Printer, Sublimation Ink, Transfer Paper, RIP Software, Heat Transfer Machine & Fabric.

Digital sublimation printing is that no plates are required, so it is ideal for customizing designs with changing elements such as names, numbers, etc. Sublimation is quick and easy to produce, allowing for same day or same hour printing, as well as on demand printing that reduces risk and wastage.

You will find complete solution of sublimation printing at Krishna Home Textiles. We are not compromising on quality, KHT offers wide range sublimation print on all kind of polyester fabric, Polycot fabric, Chenille fabric, Jute fabric and any kind of polyester bland fabric.

Our capacity to print more than 50,000 Meter in a month .

We have advance print Machine can print 360 dpi to 1080 dpi with HD quality (720 x 1,080) , We can print maximum width 76.4 in which is Sufficient for shower curtain product also.

We have advance automatic heat transfer machine which is HD quality transfer on all kind of fabric maximum width 76”

Print on 100% Polyester Fabric, We can print all kind of polyester fabric.

Print on Polycot Fabric, We can print all kind of Polycot fabric. More percentage of polyester will give more clarity print and sharpness.

We Print on Jute ,Chenille, Velvet and apostasy Fabric also, There is no any addition process require on fabric before printing only RFD is ok for print.

Our Stitching Machine & Capacity
